## SUMMARY

Self-taught (mostly) web developer, eager to apply skills in real-world projects and grow further. Currently a 1st-year (2nd in autumn) student taking CS at the Institute of Mathematics and Informatics at RAU. Took first course at Tumo Stepanakert when I was 10. Passionate about computer science, tech, and programming. I also occasionally do theater shows with my friends at SRDT for fun, so maybe in 10 years I'll combine my software development skills and experience in theater to start a company to disrupt the local theater industry, but we'll see in 10 years.

---
